SOY-FREE

GLUTEN-FREE

DAIRY-FREE

VEGETARIAN

Arginine: Get fuel to your muscles!

Arginine helps to increase levels of nitric oxide, which gets more blood flowing to your muscles to deliver extra oxygen and nutrients so you can work harder.

Creatine: Increase your power!

Creatine is a naturally occurring compound that helps supply energy to muscle, which can result in increased power, strength and speed.

Beta-alanine: Keep pushing until the end!

Beta-alanine produces carnosine, which decreases the buildup of lactic acid to help reduce fatigue.

Caffeine: Be alert!

Every scoop provides you with 80mg of naturally sourced caffeine from tea leaves.

Informed-Sport Certified:

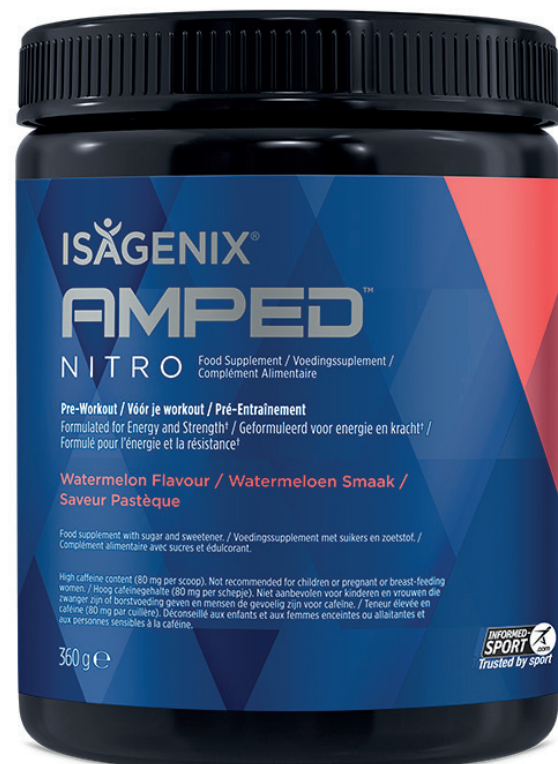

Competitive athletes can feel confident AMPED Nitro has been tested for quality and World Anti-Doping Agency banned substances.

YOUR PRE-WORKOUT PLAN!

Training sessions are tough enough, so we've created AMPED Nitro, your new pre-workout solution, to provide energy, strength and focus so you can push harder, train better and go further in your workout. Whether you're just getting started or are an elite athlete, AMPED Nitro is here to take your training to the next level.

PERFECT FOR:

Adults who want to increase strength, energy and stamina during workouts

ISAGENIX®

WHY AMPED NITRO SHOULD BE ADDED TO YOUR **WORKOUT**

TRAINING SUPPORT

Formulated with active ingredients at levels shown to help you to train at a higher intensity for longer*.

MAXIMISE YOUR WORKOUT

The ideal pre-workout solution with targeted ingredients to increase energy levels and help you get the most out of your workout.

COMPLETE NUTRITION SYSTEM

Using AMPED Nitro as your pre-workout, AMPED™ Hydrate during your workout and IsaPro® for recovery, you're getting a complete nutritional system to ensure your body is supported with what it needs during each phase.

HOW TO USE:

1. Mix 1 scoop with 240ml water.

2. Drink 15-30 minutes before you get started.

For more information, please contact your Isagenix Independent Associate.

* Every serving provides 3g of creatine. Creatine increases physical performance in successive bursts of short-term, high intensity exercise.
