Visit [ANZ.IsaBodyChallenge.com](http://ANZ.IsaBodyChallenge.com) for full terms and conditions.

Weight loss should not be considered typical. In a study performed in 2012 by University of Illinois at Chicago researchers, subjects lost an average of 4.1 kg with an average of 0.9 kg of the loss from visceral fat after 30 days on an Isagenix Program. The subjects also had a greater level of adherence and had more consistent weight loss from week to week compared to subjects on a traditional diet. Always consult your physician before making any dietary changes or starting any nutrition, weight control or exercise program.
