Values are determined through a proprietary Isagenix System and are not linked to values in other food-scoring systems. While most healthy adults can consume up to 400 milligrams of caffeine per day, you should monitor your caffeine intake on Cleanse Days and consider your personal tolerance when choosing caffeinated snack options.

**You should consult your physician or other healthcare professional before engaging in strenuous exercise on a Cleanse Day if your physician or healthcare provider advises against it. If you experience faintness, dizziness, pain or shortness of breath at any time while exercising you should stop immediately and seek appropriate medical care, if needed.
