For a full list of ingredients, see nutrition label on Isagenix.com.

Who's It For?

- Adults who want to support healthy, youthful aging and any healthy lifestyle goals
- Ages 18+

What are Telomeres?

Telomeres are the protective caps at the ends of our cells' chromosomes that help protect our DNA from damage. As we age, our cells are constantly dividing and our telomeres gradually shorten. Oxidative stress, toxins and a poor diet can cause the process of telomere shortening to speed up, which means we age faster in life.

Benefits

- Antioxidant Support Supports the body's antioxidant enzyme
- Start from the inside out with advanced telomere support. IsaGenesis helps protect telomeres for optimal cell function
- Comprehensive care. Healthy cells mean more healthy-aging benefits supports liver, kidney and brain health, cell integrity and healthy circulation

How To Use

One serving consists of two softgels. Take two servings daily; once in the morning with breakfast, and once at lunch or in the evening with dinner, depending on personal preference.
