Tips

- Remove caps and lids before recycling.
- Check with your local recycling plant to see if labels need to be removed before recycling.
- Plastic overwrap on the outside of boxes is generally recyclable for store drop-off along with other plastic film and grocery bags.
- Clean and empty product bottles before recycling.

*Only the bottles and canisters are generally recyclable. The labels, caps, and lids affixed to Isagenix canisters may not be recyclable in your area.

**These products contain a pump made of nonrecyclable material.
